

# Drive-Thru / Service Windows

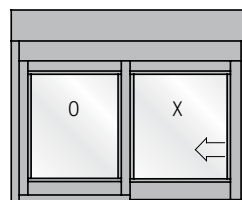

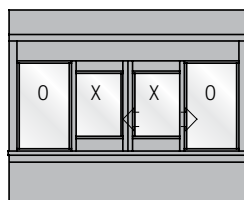

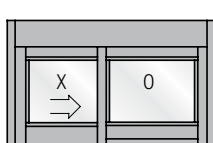

Top left: Horton drive-thru window / Bottom left: Horton walk-up window

## Drive-Thru Service Windows

Horton service windows are standard equipment for leading restaurant chains, pharmacies and other companies. Units can be customized with transaction drawers, up to 1" insulated glass, a variety of counter tops such as stainless steel and other specified options. The windows open and close automatically when activated by Horton's HipScan™ or WinScan™ and can also be opened manually. An optional automatic lock secures the window each time it closes.

- Auto-close and reverse-on-contact functions
- Maximum security lock
- Fully assembled and glazed for easy installation
- Available in anodized aluminum, paint and metal-clad finishes
- Bullet-resistant glass option

## Walk-Up Windows

Walk-up windows are the next best thing for business transactions. Walk-Up windows are being used for more than just retail centers and pharmacies. You can also find them at banks and restaurants.

A walk-up window can help increase foot traffic to your building. It also gives the added capability of late-night sales while having the the inside of the building closed.
